SUMMARY

Results-driven Web Developer with **3.6 years of experience** building and optimizing frontend applications across **SaaS products**, enterprise dashboards, responsive web platforms, and **kiosk systems**. Experienced in implementing **SEO strategies**, secure **RBAC workflows**, and **scalable frontend architectures**. Strong advocate for clean, reusable code, design systems, and maintainable solutions that support long-term product growth.

SKILLS

Core: React.js, Next.js, TypeScript, JavaScript

UI & Styling: Tailwind CSS, SCSS, HTML5, CSS3

State / Data / Routing: TanStack Query, Context API, React Router, REST APIs

Tools: Git, GitHub, Postman, VS Code, Vercel, Laravel Forge, Docker

Strengths: RBAC, Performance Optimization, Responsive Design, SSR, Reusable UI Systems, SEO, Agile / Scrum

HIGHLIGHTS

- 1,500 payees maintained on Smile Payee Services.
- 40+ projects maintained and delivered.

EXPERIENCE

Web Developer

12Grids Technologies

📅 March 2023 – Present 📍 Hybrid, Mumbai

Smile Payee Services — US-based Fintech *React, Laravel*

- Led frontend development for the team, **architecting** a payee-services product and transaction-management admin **from scratch** for **scalability**.
- Built a **PDF viewer and reviewer system** that automated budget and transaction workflows; created export PDFs and automated emailers.
- Designed reusable, scalable components and **custom hooks** for **RBAC** and table filtering; drove **SEO optimization** across the site.
- Mentored juniors on clean-code practices, reviewed and debugged team code. **Recognized by directors** for on-time delivery.

BMC RecZone — Municipal Sports-Complex Booking *Laravel, jQuery, React*

- Led a team of three to build the complete booking-system UI, homepage, and member login flow.
- Built and integrated the bookings admin with **RBAC** and **TanStack Query**; created ticket PDFs and emailers; owned code review and bug fixes.

CSMVS Booking System — Museum Ticketing Kiosk *Laravel, jQuery, Windows*

- Digitized the museum's booking system by building the full **kiosk UI** and integration, deployed on Windows.
- Generated ticket PDFs, built emailers, and maintained the admin and offline booking flow; supported peers with bug fixes.

BMC Zoo — Mumbai Zoo Ticketing *React, Laravel, Windows*

- Maintained kiosk, website, and admin; added new booking categories across online and offline flows; built an offline parking-booking kiosk.

BMC VHD & Cool the Globe *React, Laravel*

- Built admin panels and integrated website forms with **RBAC** and **TanStack Query**; created custom form/table components, reusable components, emailers, and subtle UI animations; performed code review.

SBI Payments & BMC Nature Trail *Next.js, React, Laravel*

- Built responsive homepage and marketing UIs with subtle animations; maintained projects and reviewed booking-flow code.

Intern

12Grids Technologies

📅 January 2023 – March 2023 📍 Hybrid, Mumbai

Mangroves Forest Department Digital Exhibitory – Interactive Kiosk *PHP, SCSS, jQuery, Linux*

- **Built 50+ animated, interactive pages** across four narrative flows (livelihood, biodiversity, ecosystem, foundation) using SCSS, jQuery, and Lottie.
- **Handled client communication**, selected deployment hardware/OS, and deployed on **Linux** with a locked-down window manager for offline kiosk use. **Recognized by directors** for fast delivery.

BMC Swimming Pool *Laravel, React, jQuery*

- **Revamped** the homepage and pool detail pages — added live status cards, live stats, booking steps, and a membership fee schedule table; integrated UI via Handlebars + jQuery and built **React admin components**.

Art of Investing *PHP, SCSS*

- **Built** an animation-rich website with varied layouts using HTML and SCSS.

ADDITIONAL CONTRIBUTIONS

- **Owned deployments** using **Vercel** and **Laravel Forge**; improving deployment quality with **Docker** (one internal application containerized and deployed so far).
- **Contributed to 40+ projects** spanning new builds, **SEO improvements**, maintenance, and code review; supported **tech-stack migrations** across projects.
- **Led teams**, taught and **mentored interns**, and provided ongoing technical guidance.
- **Adopted Claude (AI-assisted development)** to boost productivity and deepen system-design and scalability knowledge — managing token/plan files and building reusable packages and skills to cut token usage.

EDUCATION

B.E. Computer Engineering

University of Mumbai

📅 2018 – 2022 📍 Mumbai, India

CGPI: 8.01

PROJECTS

URL Shortener *JavaScript, Node.js, MongoDB, HTML, CSS*

A web tool that converts long URLs into short links with click analytics and link tracking.
